# PROVECTA

*A Green Revolution in Pest Management*

## HOW DOES PROVECTA WORK?

Most of the pesticides in market contain active ingredient in order to kill pests. It always a challenge when doing treatment in sensitive areas like restaurant, food factory, hospital, kitchen etc.

**PROVECTA** is the ideal solution for you.

Provecta is an innovative formulation with nanotechnology and kills pests via its unique physical mode of reaction. When applied onto pest, billions of nano-particles penetrate into their respiratory system and dry within seconds, thus immobilize the pest physically (instant knockdown). As a result, pests died of dehydration and suffocation.

100% non-toxic, 100% green, 100% kill.

### Immobilization

Permeable 3 Dimensional immobilizing (gluing) network structure

### Mechanical immobilization

of spiracles' valve

- **ZERO toxic**
  - No active ingredient, safe to apply at sensitive sectors
- **ZERO smell**
  - No pesticide smell
- **ZERO stain**
  - No visual residual on the surface, zero damage to the structure of building
- **ZERO resistance**
  - Kill insect with physical mode of action, zero chemical resistance
- **ZERO repellent**
  - No hyperaction on insects, work well with bait (e.g. gel bait)
